OUR STORY

 OF SAUNA

THREE GENERATIONS OF SAUNA TRADITIONS

Paul Nellis

HUUM was born from a legacy of craftsmanship and innovation in sauna stove production. Its founder, Siim Nellis, represents **the third generation** of a family dedicated to creating high-quality sauna stoves. This journey began with his grandfather Paul, a skilled stove-setter, and continued with his father's work, both of whom were committed to building durable and efficient sauna heaters.

Siim, driven by a desire to share the captivating Estonian sauna traditions with the world, combined this rich heritage with innovative technology and exquisite design.

Siim Nellis
Founder of HUUM OÜ

THE STORY BEHIND OUR FIRST DESIGN HEATER: DROP

Sauna stoves have a long history, but their design was often overlooked until Siim Nellis envisioned a modern and efficient design that also captured the eye. In 2011, Siim collaborated with the **Estonian Academy of Arts**, where students of product design proposed various concepts. Among them was a wall-mountable, rounded sauna heater inspired by a drop of water. This idea was refined and by 2013, the **DROP sauna heater** was ready for production. Its unique shape and minimization of metal maximize the use and exposure of sauna stones, ensuring gentle, long-lasting steam while for greater efficiency, easier installation, and lower power consumption.

The **DROP** sauna heater's exceptional design and masterful craftsmanship were recognized globally, earning it the prestigious **Red Dot Product Design Award in 2015**.

reddot award 2015
honourable mention

Over the past decade, HUUM has continued to win numerous awards and has become a trusted choice for sauna enthusiasts who value quality, innovation, and mild steam. Our products are cherished by a diverse customer base, from athletes to Hollywood producers.

Based in Southern Estonia, HUUM is powered by a passionate team of sauna enthusiasts. Our mission is to create the most satisfying and health-enhancing sauna experiences by integrating superior functionality, beautiful design, and modern features into every product we make.

ESTONIAN SAUNA TRADITIONS

The Estonian sauna, known as “**saun**”, is a tradition that stretches back thousands of years, with roots that likely reach the Iron Age. More than just a method of cleansing the body, the sauna holds a deep cultural significance in Estonia, intertwined with social rituals, health benefits, and even spiritual practices.

Historically, the sauna was considered a sacred space where key life events took place. It was common for women to give birth in saunas, as the warmth and cleanliness were believed to be beneficial.

The sauna was also where the deceased were prepared for burial, marking its role at both the beginning and end of life. In daily life, the sauna was not only a place for bathing but also a social hub where people gathered to discuss community matters, share stories, and relax.

Estonians have long believed in the healing powers of the sauna. It was traditional to use various plants and herbs, either by placing them on the hot stones to release their aromas or by creating bundles called “viht” or “vihad” to gently beat the body.

This practice is not about inflicting pain but rather about stimulating the skin and circulation. The fresh scent of birch or other tree leaves, sometimes mixed with other plants, combined with the sound of the leaves gently striking the skin, is a quintessential part of the sauna experience.

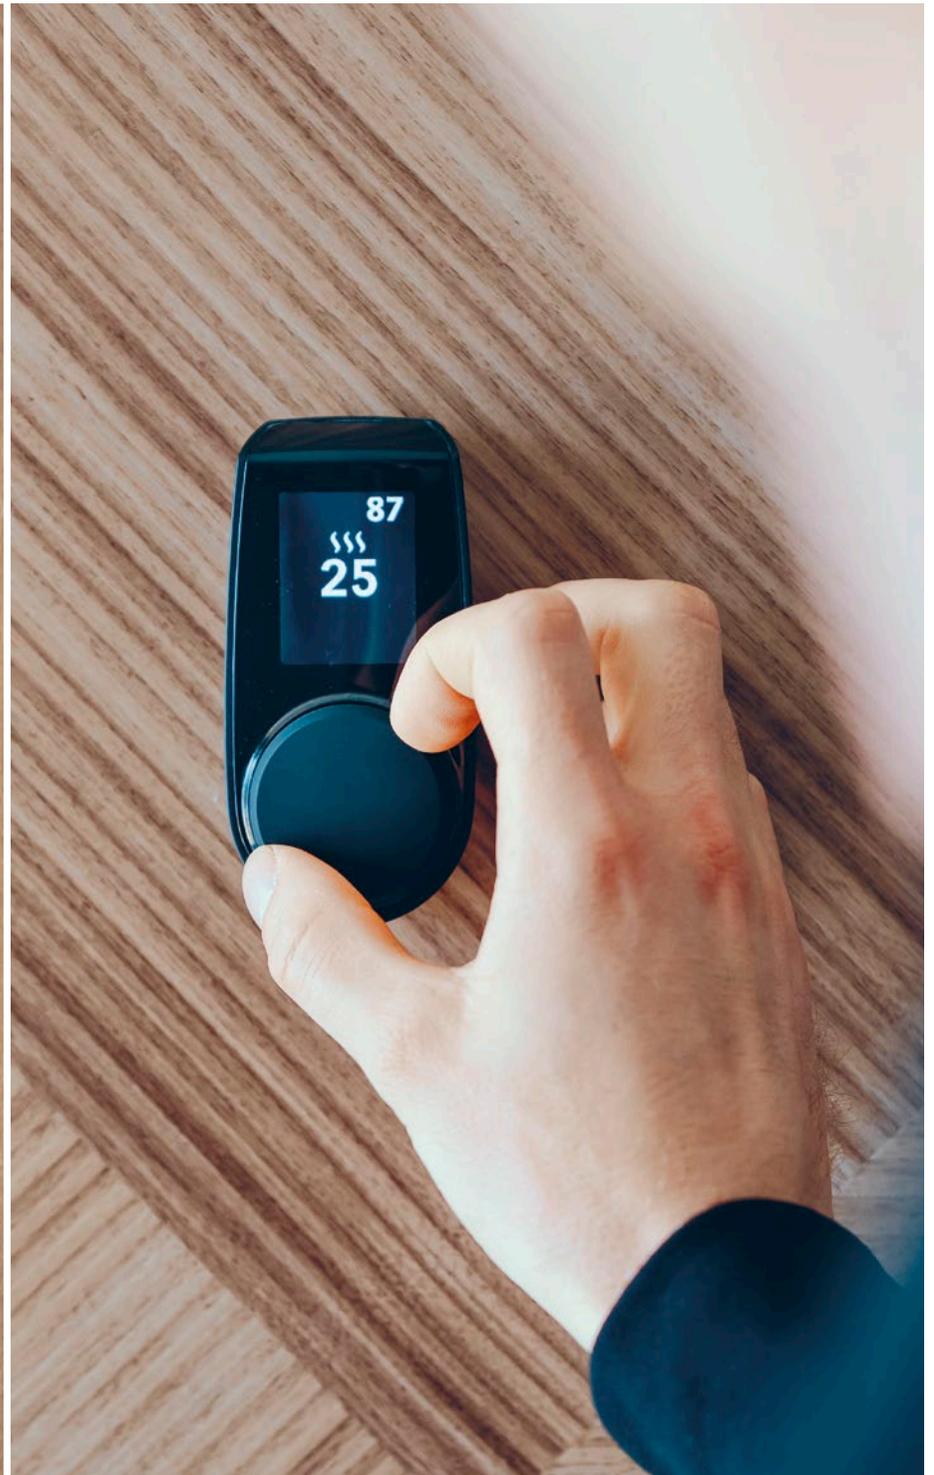

Singing and other ceremonies were also common within the sauna.

Mooska smoke sauna, Estonia

The smoke sauna, Estonia's oldest type of sauna still in use, likely evolved from early pit or tent saunas. Stones heated by fire would have water poured over them to create steam. A smoke sauna, notably, lacks a chimney, and the smoke from the fire heats a large volume of stones. The heating process is lengthy, taking often well over 8 hours, during which the sauna fills with dense smoke that blackens the walls, ceiling, and stones with soot. After the stones are sufficiently heated, the fire is allowed to die out, and the sauna is ventilated to clear the smoke. The stones retain their heat for a long time, offering a prolonged and soothing “leil” (steam) experience.

HUUM's heaters are inspired by traditional smoke sauna. By incorporating a large volume of stones, our heaters provide the same gentle, long-lasting steam characteristic of traditional smoke saunas, but with the added comfort and convenience of modern technology. We are connected to our **roots and old traditions**, yet incorporate innovatively modern technology, design and comfort so you can enjoy the best possible sauna.

SAUNA CONTROLLERS

CLASSIC Series

GLASS Series

reddot winner 2021

UKU 4.2 SAUNA CONTROL SYSTEM

UKU control system is a modern way to heat a sauna.

The sauna can be controlled from a stylish control panel on the wall or, in the case of the WiFi control system model, even from a smartphone.

UKU ensures a comfortable and safe sauna experience.

- ◆ a selection of stylish control panels
- ◆ for heaters up to 18 kW
- ◆ connectable to lights or ventilation
- ◆ steamer up to 2,5 kW
- ◆ child safety lock
- ◆ timer

Connects with others

UKU is compatible with different manufacturers' heaters with an EN 60335-2-53:2011+ A1+A2+A11:2023 certificate.

UKU SAUNA CONTROL SYSTEM OPTIONS

UKU WiFi control system requires a connection to a WiFi network to communicate with the mobile app. Therefore, it is suitable for home saunas or other saunas already in the WiFi range.

UKU Local may be the right choice if you are not interested in heating your sauna from the phone. The UKU Local control system makes sauna heating easy and comfortable. You can connect it to your heater, sauna's lights/ventilation and steamer functions and regulate all of them from a stylish control panel on the wall.

HUUM MOBILE APP

UKU+App incorporates all the features of the UKU Local control system while adding an extraordinarily **comfortable** remote control option through a mobile app. With the HUUM mobile app, you can heat your sauna comfortably from wherever you are. Whether you are at the end of a long working day or going out for a run, you can have a hot sauna waiting for you when you get home with just **a couple of taps on your phone**.

You can choose the beginning and end time of the heating, set the target temperature, and check the current temperature at any given moment.

HUUM mobile app works with UKU WiFi control system models.

- ◆ eight different languages (ENG, EST, GER, FIN, RUS, POL, ITA, FRA)
- ◆ unlimited number of users
- ◆ notification when the target temperature is reached
- ◆ lights/ventilation or steamer control
- ◆ calendar for booking sauna in advance
- ◆ statistics about sauna use

DROP electric heater is inspired by the purest element of nature - a drop of water. DROP's round design softens and enlivens the interior of the sauna, adding elegance to the sauna room. Apart from good looks, DROP has other outstanding features. The compact wall-mounted heater holds up to 55 kg of stones, outperforming even some wood burning sauna stoves and ensuring **long-lasting steam**.

DROP is compatible with the WiFi-capable control system UKU, so that you can conveniently heat the sauna via the mobile app, while you are still out on the trail or finishing a long day at work.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ heater mounting plate
- ◆ reflector
- ◆ heating element retainer
- ◆ the DROP 7 and DROP 9 models come with a heat diverter

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (5-10 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ safety railing
- ◆ embedding flange
- ◆ drip tray

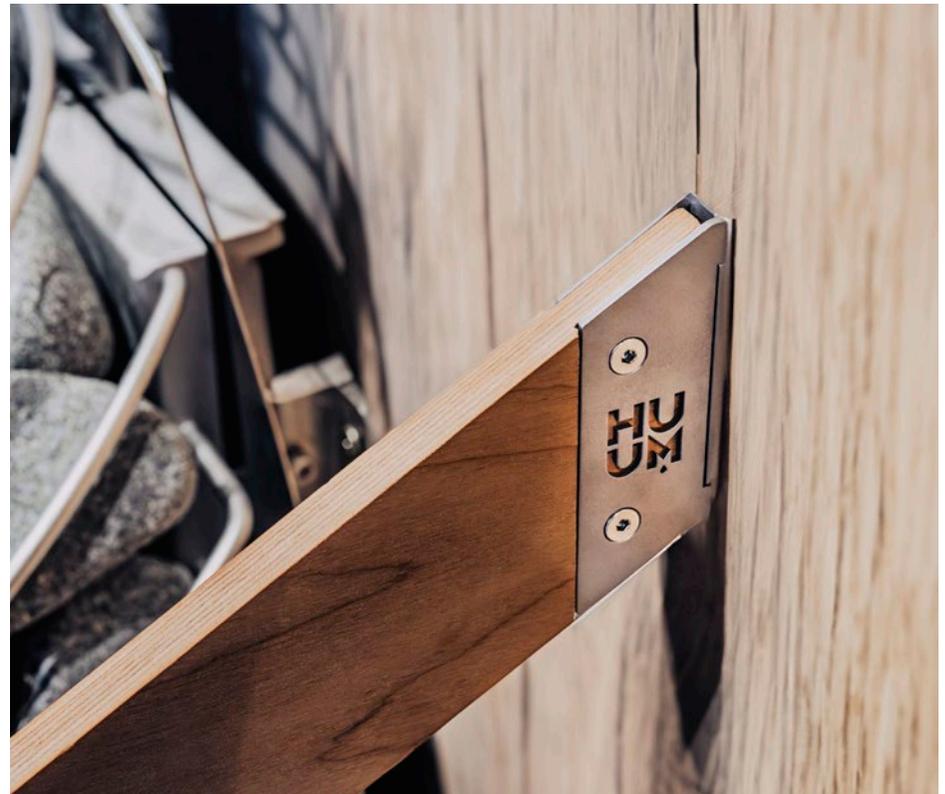

EMBEDDING FLANGE

The embedding flange is useful when you plan to install your heater partly inside the sauna bench. It is made of stainless steel, and it covers the wooden edges around the heater, leaving the final result looking refined and smooth.

SAFETY RAILING

A protective railing made for DROP heaters. Light wooden arcs and stainless-steel supports create a clean, airy look while helping prevent accidental contact with the hot heater.

DRIP TRAY

The drip tray of the DROP electric sauna heater helps keep your sauna clean and dry by preventing moisture buildup in the steam room. Designed for optimal moisture control, this high-quality accessory prevents water from accumulating under the heater, protecting your sauna floor and ensuring a cleaner environment. Crafted from durable, heat-resistant materials, it withstands the high temperatures and humidity of your sauna.

HIVE Mini electric heater is a slimmer version of the HIVE heater. The heater holds 150 kg of stones and is suitable for smaller saunas, but can also heat larger sauna rooms. Like its bigger brother, the HIVE heater, the HIVE Mini is inspired by a hive of wild bees and is an ideal centerpiece for a sauna.

HIVE Mini is compatible with the WiFi-capable control system UKU.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs
- ◆ air tunnel

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (5-10 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ embedding flange
- ◆ reflector
- ◆ safety railing

HIVE electric heater is an elegant solution for larger saunas and a suitable choice for spas and sports clubs. The amount of sauna stones is impressively large, reaching up to 250 kg. In this way it delivers long-lasting, hot steam even for a larger groups who wants to enjoy sauna without haste. The round shape of the heater imitates a wild beehive and brings the group together.

HIVE is compatible with the WiFi-capable control system UKU.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs
- ◆ air tunnel

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (5-10 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ embedding flange
- ◆ reflector
- ◆ safety railing

EMBEDDING FLANGE

The embedding flange is useful when you plan to install your heater partly inside the sauna bench. It is made of stainless steel, and it covers up the wooden edges around the heater, leaving the final result looking refined and smooth.

REFLECTOR

Placing a reflector on the heater makes it possible to reduce the safety distances by half from the walls. It is made of stainless steel and is mounted on the side of the heater. The reflectors can be connected together.

◆ compatible with all HIVE models

SAFETY RAILING

Safety railing helps protect you from accidentally touching the hot heater. The railing consists of light-colored wooden arcs and stainless steel supports to attach them to the heater. Not only does the railing provide extra safety – but it is also an excellent way to enhance the look of your heater.

- ◆ for HIVE: Ø 655 mm
- ◆ for HIVE Mini: Ø 555 mm

CLIFF / STEEL HEATERS

An environmentally conscious series

These heaters incorporate the engineering ingenuity that is environmentally sustainable. CLIFF/STEEL heaters come from the same origin. They are made of the same sheet of metal. STEEL heater cut-outs are used to create the ribs of the CLIFF heater without wasting any material.

They are similar in power and volume, and both have a built-in air tunnel, which ensures better ventilation and extends the life of the heating element. However, the nature and differences of the heaters lie in their external dimensions, safety distances, and the amount of stones used. The result is a range of aesthetically designed, space-saving heaters for smaller saunas.

**EUROPEAN
PRODUCT
DESIGN
AWARD**

CLIFF electric heater imitates the northern coastal cliffs. The CLIFF heater's eye-catching stone surface evokes a sense of timeless nature in the sauna room. A large stone capacity ensures a mild but abundant steam. The air tunnel built into the heater guarantees efficient air flow, accelerates heating and extends the life of the heating elements. The small safety distances of the heater also make it suitable for more compact home saunas.

CLIFF Mini electric heater is an even slimmer, wall-mounted model of the CLIFF heater, which is suitable for small sauna rooms. Both heaters are compatible with the UKU sauna control system.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs
- ◆ air tunnel

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (3-5 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ embedding flange

STEEL is a stylish electric heater with exceptionally small safety distances for smaller sauna rooms. STEEL holds plenty of stones, ensuring mild but abundant steam. The built-in air tunnel creates an effective air flow, accelerates heating and extends the life of the heating elements. The stainless steel STEEL heater gives the sauna room a modern look and carries the principles of sustainable production. There is no material waste when manufacturing the heater—the ribs of the CLIFF heater are made from the cut-outs.

STEEL Mini electric heater is a slimmer, wall-mounted 3,5 kW model of the STEEL heater, which is suitable for even smaller sauna rooms. Both heaters are compatible with the UKU sauna control system.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs
- ◆ air tunnel

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (3-5 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

The stylish **CORE Black** is our special, modern-design heater. With its sleek black metal casing, it is a great choice. Black is a classic color that transcends trends, giving the heater a timeless appeal.

In spite of its compact dimensions, the CORE heats swiftly, delivering a gentle steam experience.

The safety distances of the heater are exceptionally small, only 4 cm. Making it perfect for compact and tight spaces that require a blend of modern design, powerful performance, and the traditional Nordic method of creating steam in the sauna.

CORE Black is compatible with the UKU sauna control system.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs

REQUIRES ALSO:

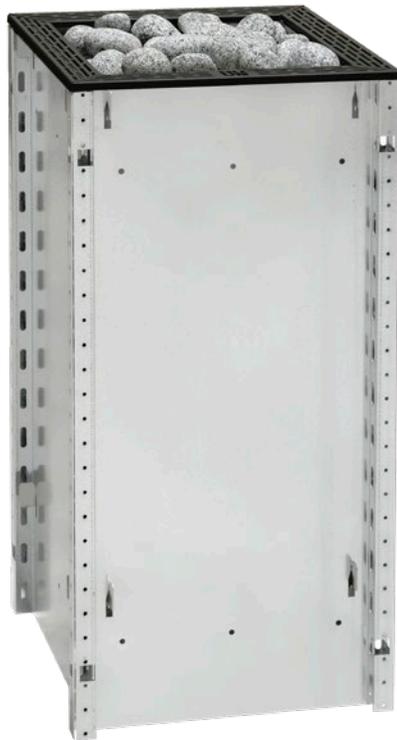

- ◆ sauna control system
- ◆ stones (5-10 cm)
- ◆ heat-resistant power cable

ACCESSORIES:

- ◆ safety railing

CORE BK

CORE ST

CORE BK / ST electric heater gives you creative freedom.

CORE heats up the sauna quickly and gives pleasant steam, but what makes it special are the designable side panels. Depending on the interior, you can use ceramic tiles, stone or wood. The safety distances of the heater are exceptionally small, only 4 cm. **CORE** can be fully immersed in the sauna bench and fit into small sauna rooms.

We offer **wooden side panels** as an additional product. The wooden finish is a particularly convenient choice for families with small children, for example—the risk of burning yourself against the heater is very low.

CORE BK / ST is compatible with the UKU sauna control system.

THE SET INCLUDES:

- ◆ electric sauna heater
- ◆ adjustable legs
- ◆ installation plates for the outer cover

REQUIRES ALSO:

- ◆ sauna control system
- ◆ stones (5-10 cm)

HUUM CORE Wall Combi and **CORE Wall Mini Combi** extend the CORE series with integrated steam functionality for an even more versatile sauna experience.

In addition to traditional dry heat, these heaters feature a built-in 3–5 L water tank that produces soft, humid steam for up to two hours. The aroma basin allows you to enhance your sauna sessions with natural fragrances, adding a spa-like dimension to your sauna session. Designed for flexibility, the Combi models are available in power outputs from 3,6 kW to 9 kW, covering sauna rooms from 3–13 m³.

B	500 mm	500 mm	500 mm	500 mm
C	750 mm	750 mm	826 mm	826 mm
D	min. 1000 mm	min. 1000 mm	min. 1000 mm	min. 1000 mm

The **HIVE Flow** is the ideal choice for those who value environmentally conscious design and wish to have a memorable sauna experience.

The HIVE Flow stove's innovative design directs 75% of heat into your sauna, providing lasting warmth and steam. Its low emissions and minimal particulate output meet the stringent German environmental standard BImSchV Stufe 2.

Thanks to its unique patent pending construction, the HIVE Flow stove has safety distances from combustible materials of just 150 mm, compared to the usual 200-500 mm.

The large glass furnace door enhances the cozy ambiance of your sauna, letting you enjoy the mesmerizing flames.

HIVE Flow LS and **Mini LS** are models with the hearth extension which allow the heater to be fired/heated from an adjacent room.

THE SET INCLUDES:

- ◆ wood-burning sauna stove

REQUIRES ALSO:

- ◆ stones (5-10 cm)
- ◆ connection to chimney

- ◆ patent-pending construction
- ◆ model HIVE Flow LS and Flow Mini LS allows heating from another room
- ◆ complies with BimSchV II
- ◆ Ecodesign

ACCESSORIES:

- ◆ stone cage
- ◆ protective bedding
- ◆ mounting collar
- ◆ protective floor plate

MOUNTING COLLAR

The sauna stove installation collar is an elegant and functional solution that highlights your attention to detail, giving your sauna a complete and polished appearance.

Available in two versions—2 mm stainless steel and black, heat-resistant coated aluminum—this product is designed to meet various aesthetic and practical needs. Both versions are specifically crafted for use with HUUM HIVE Flow LS stoves, ensuring a perfect fit and a seamless transition between the stove and the wall.

PROTECTIVE FLOOR PLATE

The floor protection plate is a safety-enhancing accessory designed for use when the heater is placed on a wooden or other combustible material floor. It protects the combustible material floor from fire hazards in accordance with general fire safety requirements.

◆ **Measurements:** 42 x 45 cm

PROTECTIVE BEDDING OF HIVE Flow LS

The protective bedding is intended for use when the sauna stove is placed on a wooden floor or other floors of combustible material. We also recommend using it if there is underfloor heating pipes under the heater.

Photo by: HeartWood

HIVE Wood has taken the ancient wisdom of sauna construction to a new level. The hearth of the sauna stove is designed so that the flame is powerful, the combustion is efficient and the stove is durable. The flame cutter in the hearth, exposed to the harshest heat, is made of 5 mm thick steel and is exceptionally durable. It is possible to hide a heat exchanger under the stones to heat the sauna water. The round design of the sauna stove is inspired by a beehive, it holds plenty of stones and produces pleasant steam.

HIVE Wood LS is a model with the hearth extension which allows the stove to be heated from an adjacent room.

THE SET INCLUDES:

- ◆ wood-burning sauna stove

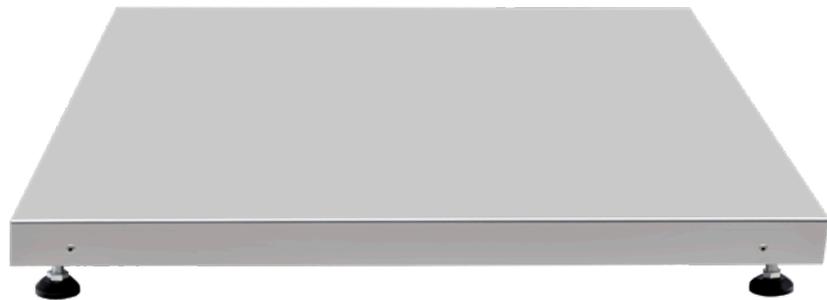

REQUIRES ALSO:

- ◆ stones (5-10 cm)
- ◆ connection to chimney

ACCESSORIES:

- ◆ reflector
- ◆ stone cage
- ◆ protective bedding (not for LS models)

PROTECTIVE BEDDING

The protective bedding is intended for use when the sauna stove is placed on a wooden floor or other floors of combustible material.

We also recommend using it if there is water floor heating piping in the floor under the heater.

- ◆ suitable for all HUUM wood burning sauna stoves (not for LS models)

REFLECTOR

The reflector makes the safety distances of the sauna stove considerably smaller.

It allows the safety distances to be reduced by half of existing safety distances.

STONE CAGE

The stone cage is mounted straight on the sauna stove around the flue and filled with sauna stones. Thanks to the added stones, the surface for pouring water significantly increases. This means fewer hot metal surfaces, which we aim to keep to a minimum in the sauna.

The stone cage filled with sauna stones is also a decorative element that matches the sauna stove.

Stone cages can be installed on top of each other.

- ◆ height: 43 cm
- ◆ diameter: 30 cm
- ◆ holds 35-40 kg of stones
- ◆ suitable for all HUUM wood burning sauna stoves

CHIMNEY SETS

HUUM chimney kits are designed as a simple, modular system: one **Main Set** that covers most standard sauna installations, plus **two Extension Sets** for special layout needs. All sets are certified, high-quality solutions with a T600 temperature class and are available in stainless steel or a black-painted finish.

Main Set – the universal base kit for taking the chimney straight up from the top of the heater and out through the ceiling/roof, suitable for most sauna buildings (including slightly inclined or curved/barrel ceilings), thanks to universal cover sheets and a rubber roof flashing.

Extension 01 (Wall Exit) – add when the chimney needs to be routed through a wall to an external wall, using a 90° solution and wall fixing elements.

Extension 02 (Attic / Double-Roof) – add when the chimney must pass through a suspended ceiling and attic/double-roof structure, especially where thicker insulation is used between the sauna and the attic.

Need extra height or special details?

Additional chimney sections and accessories are available separately.

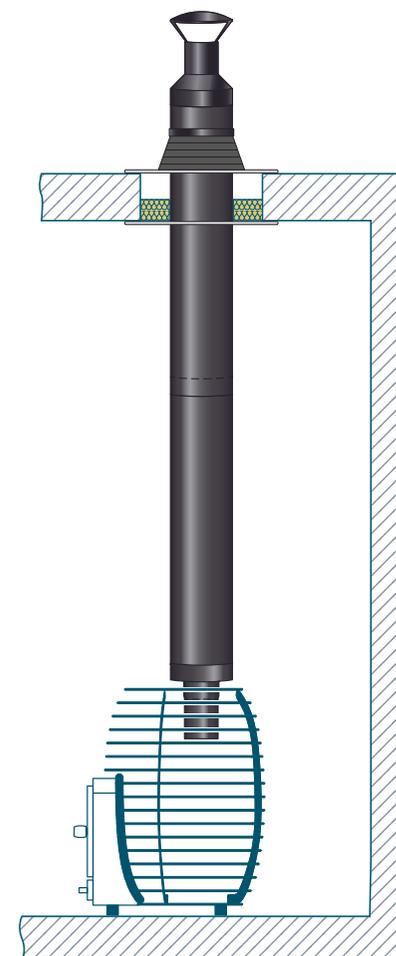

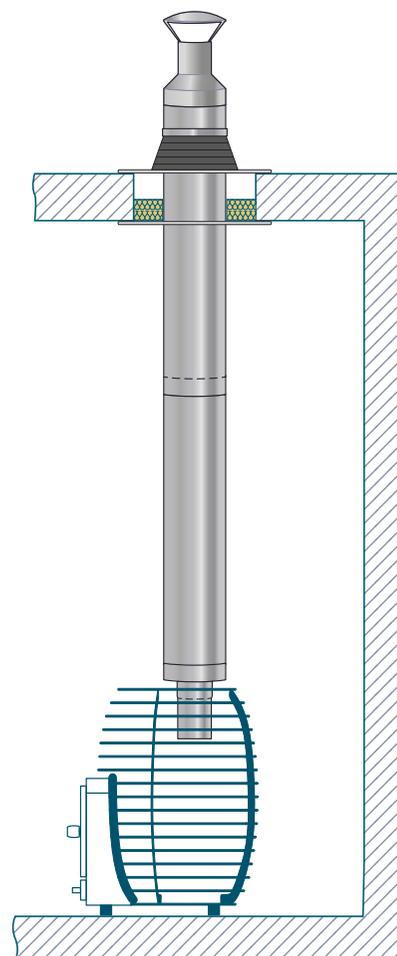

CHIMNEY MAIN SET

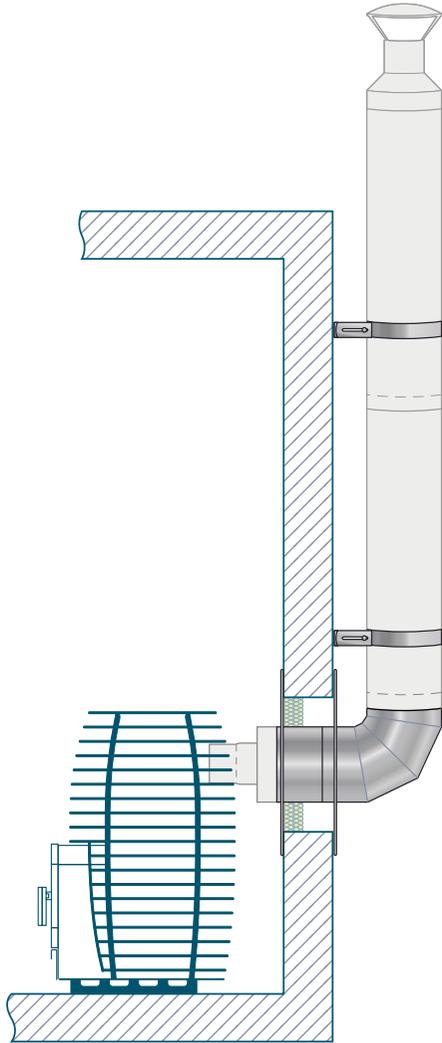

Everything you need for a clean, straight-up installation.

The HUUM Chimney Main Set is a practical “starter kit” designed to connect from the top of the heater and run vertically through the ceiling and roof. It works well in most sauna buildings, including slightly inclined and curved/barrel ceilings, thanks to universal cover plates and a rubber roof flashing.

What’s in the box (key parts): double-wall chimney elements, welded base and chimney cap, universal roof flashing, universal cover plates, plus a cut-to-length single-wall adapter and T600 insulation plates for wall/ceiling transitions.

Need more height or a different layout?
Add chimney extensions or accessories as required (sold separately).

CHIMNEY SET - EXTENSION 01

For installations where the chimney must exit through a wall.

Extension 01 is used **together with the Main Set** when you want to route the chimney to an external wall. It provides a compact **90° solution** and the necessary wall fixing elements.

What's included: a 90° double-wall elbow, a short double-wall chimney section, universal cover plates, and adjustable wall brackets to securely fix the chimney run.

Tip: If you also need extra height outside, simply add straight chimney sections (sold separately).

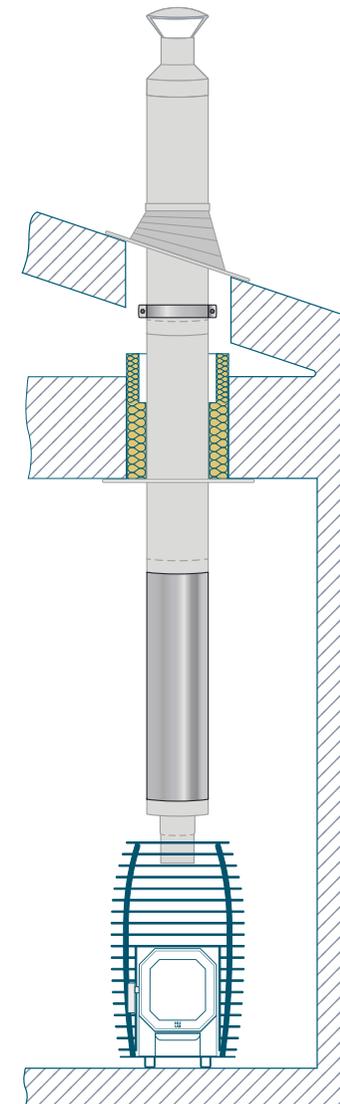

CHIMNEY SET - EXTENSION 02

For double-roof structures and insulated attic passages.

Extension 02 is used **together with the Main Set** when the chimney must pass through a suspended ceiling and an attic/double-roof structure—especially where thicker insulation is used between the sauna and attic.

What's included: a roof-rafter attachment for stable support, a dedicated **T600 insulation detail for the ceiling**, and an additional double-wall chimney section.

Need more height above the roofline? Add straight chimney sections and connecting accessories as needed (sold separately).

STONES

ROUNDED STONES

HUUM's use of polished round stones for sauna heaters is based on both functionality and aesthetics. Olivine diabase sauna stones are enduring, and their thermal capacity is high.

Round stones perfectly complement the rounded shapes and minimalist design of our heaters, creating a visually harmonious whole.

However, the visual aspect is not the only reason we prefer polished round stones. The process of rounding the stones allows us to ensure their high quality – during the process, defective and cracked stones are eliminated, leaving only strong and durable stones. These stones are better able to accumulate and evenly distribute heat, ensuring a pleasant and consistent sauna experience.

Round stones also offer practical advantages. Due to their shape, they cannot be stacked into a monolith in the heater, leaving necessary air channels between them. These channels ensure that air circulates freely, preventing the heater from overheating and extending its lifespan.

The frequency of stone replacement depends on the intensity of use – if used once a week, it is recommended to check the stones at least once a year. With more intensive use, the stones should be checked more frequently. Broken stones can negatively affect the heater's performance by obstructing air circulation and causing the elements to overheat. Therefore, it is important to ensure that the stones are always intact and in good condition.

In summary, polished round stones are HUUM's choice due to their aesthetic compatibility, high quality, and practicality.

AVAILABLE SIZES:

- ◆ diameter **3-5 cm** – 15 kg package
- ◆ diameter **5-10 cm** – 15 kg package

A hand is shown pouring water from a wooden ladle into a metal basket filled with grey stones. The basket is hanging in a wooden sauna, and steam is rising from the stones. The background is a wooden wall.

STEAM LIKE IN A TRADITIONAL SAUNA

HUUM heaters are built by using minimal amounts of metal so that the heat comes mainly from the stones and only very little from the metal. This way, we can maximize the beneficial qualities associated with the stones, like in traditional saunas, and keep the positive ions from the metal at a minimum. With a high stone capacity, this is our secret to healthy, mild, and long-lasting steam.
